

# Ag Pipe

Slotted & Socked

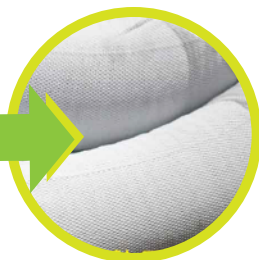

Size: 100mm x 20m

## Product Features

- ✓ Corrosion Resistance.
- ✓ Effective Drainage.
- ✓ Ease of installation.
- ✓ Full range of fittings available.
- ✓ Made in Australia.

**An even entry of water along the pipe length provides efficient and effective drainage.**

Aussie Environmental slotted & socked Ag-Pipe is a flexible corrugated pipe that performs well in both shallow and deep trenches. Commonly used to capture and divert groundwater, Ag-pipe is proven, safe solution for long-term drainage needs due to the pipe's strength, durability, joint integrity and long-term cost-effectiveness. The sock, is a geotextile sleeve made of a high tensile strength polyester mesh that surrounds the pipe, designed to prevent soil from entering through the slots in the pipe. Manufactured in accordance with AS/NZS 2439.1

## Applications

- Civil Projects.
- Retaining walls.
- Land Drainage.
- Building sites.
- Agricultural drainage.
- Mining Projects.

## Product Data

SN	Nominal Diameter DN (mm)	Outside Diameter D (mm)	Inside Diameter D (mm)	No. of slotted rows	Clear water opening (mm <sup>2</sup> /m)	Coil Length (m)	Coil Mass Approx (kg)
8	65	65	55	6	1500	10/20/200	2.3/4.6/46
