Grow Poles are a coir based substrate for attaching a large variety of climbing plants. Grow Poles are a great addition for any DIY home garden project or horticulture enthusiast. These new products are constructed using coir fibre with an outer coir netting. The inner core is made from PVC tubing for long term strength and stability.

Coir fibre has high moisture retention capacity which enables the roots of the plant to grip the natural organic fibre.

## Coir Peat

5kg Block

Price: **\$10.00 each**  
or 3x for **\$25.00**

Coir Peat/Chip (Coco Mulch) is an expanding mulch when water is added and is fast becoming the top growing medium of choice for nurseries, hydroponic growers and home gardeners alike. Coir Peat enhances the nutrient carrying capacity of plants, inducing plant growth by enhancing water retention and microbial activity.

## Coir Chip

5kg Block

Price: **\$12.00 each**  
or 3x for **\$30.00**

## Mini Coir Logs

Large

(15cm x 100cm)

Price: **\$15.00 each**

Small

(10cm x 60cm)

Price: **\$10.00 each**

Our Mini Coir Logs are the quickest and easiest way to create your own vertical garden. Simply attach your favourite epiphytic plant to the coir log and watch it grow. Suitable plants include Bromeliads, Neoregelia Bromeliads (Neos), Tillandsias and some orchids. Mini Coir Logs are made from coir fibres with an outer UV stable nylon netting and hanging cord.

Coir fibre has high moisture retention capacity which enables the roots of the plant to grip the natural organic fibre.

For best results fully immerse your Mini Coir Log / Grow Pole into a solution of Seasol and water for approximately 2-3 hours. This will re-hydrate the coir fibres and also makes the fibre easier to work with.
